## WORK EXPERIENCE

### Senior Full stack developer

Feb 2023 - Present

Run-x

- Developed the Run-x ERP platform, which includes modules for order management, driver management, fleet management, client management, contract management, and report generation.
- Designed and built APIs for the entire Run-x system and Run-x partners API to facilitate data exchange and system interoperability.
- Created API documentation using Postman and Apidocjs.
- Logged and monitored API requests/responses to ensure optimal performance and troubleshoot issues.
- Integrated third-party services such as Salla, Zid, Good Deals, Avenzur, and Deliverect.
- Built driver application APIs specifically for the Run-x driver app.
- Created public APIs for partners to integrate with Run-x.
- Managed the company's VPS server, including overseeing the database, backups, and domains.
- Developed and maintained the Run-x website and store.
- Developed the RunShip SAAS logistics platform, which includes components for B2B operations, a driver app, a supervisor app, and a store dashboard.
- Designed and built APIs for runShip platform and mobile apps.
- Manage API versioning and handle upgrades.
- Built a multi-vendor e-commerce platform (RunSouq).

### Back End Developer

Oct 2022 - Feb 2023

Qparts

- Developed QVM and QVM Seller microservices architecture and prepared APIs for front-end developers.
- Created order management, offer management, wallet, and payment systems for the QVM platform.
- Implemented order management, offer management, wallet, and payment systems for the QVM Seller platform.
- Collaborated with the Q Stock team and prepared APIs.
- Developed an admin dashboard to manage orders, offers, and ads.
- Designed database structures for order and offer management.
- Implemented JWT for secure authentication.
